Product Leader | 0 to 1 & Venture Building | AI –Native Products | Fintech | Data Privacy & Compliance

Dubai, UAE | gbekeodubango@gmail.com | +971 52 572 9331 | [LinkedIn](#)

PROFILE

Product Leader with over 8 years' experience delivering regulated digital products across compliance, fintech, enterprise transformation and AI. Track record taking ambiguous ideas from discovery and strategy through launch and adoption, while partnering with C suite stakeholders and cross-functional teams. I combine strong product judgement with hands-on expertise building and shipping AI-enabled products and automation workflows.

SELECTED ACHIEVEMENTS

- Launched the first of its kind private aviation dining platform across iOS, Android and web, creating a new customer proposition from a spotted experience gap and lifting customer satisfaction scores by 15%.
- Designed and launched an AI powered vendor intake and screening product into live operations, automatically filtering high risk vendors, removing 20 hours of manual effort per month and accelerating onboarding decisions.
- Turned a fully manual sales quoting process into an automated product that increased quoting capacity by 40%, saved 117 hours per week and supported approximately \$1.2M in monthly revenue.
- Built the first Product Management function embedded in Compliance at Vista, then extended it across Cybersecurity, HR and Travel with no dedicated engineering team.
- Led the AI Governance programme, assessing AI use cases on real viability rather than novelty and defining the policies, tooling and adoption frameworks for responsible deployment.
- Launched AML/KYC and sanctions screening integrated with Dow Jones, mitigating potential regulatory exposure of up to €20M or 4% of global annual turnover while keeping onboarding seamless.
- Led the migration from monolithic to microservice based architecture with zero downtime, improving scalability, processing performance, and platform resilience.

INDEPENDENT PRODUCT BUILDS

Nova, Autonomous AI Trading Platform

Designed, built and deployed a full trading product solo, from execution logic and automated risk management through to portfolio management, live dashboards and complete decision audit trails. Combines AI assisted setup scoring with Smart Money Concepts analysis. Stack: Python, FastAPI, Docker, Claude API, VPS infrastructure.

Agentic Operations System, UK Service Businesses

Built and deployed an agentic system running live customer and back-office operations, replacing manual coordination across enquiry handling, scheduling, content and reporting. Automates finance workflows using Claude and ChatGPT APIs with tool and function calling and agentic design, covering VAT calculations, accounts management and reporting. Delivered end to end on zero budget and in production use. Stack: Python, n8n, Claude and ChatGPT APIs, Telegram, Instagram, Google Drive.

AI Smart Mirror (Raspberry Pi 5)

Extended well beyond the standard MagicMirror² framework with a voice activated AI assistant, OpenAI integration, smart home control and a modular multi agent architecture.

PROFESSIONAL EXPERIENCE

Product Manager/Owner | Vista Global (VistaJet) Feb 2022 – Apr 2026 | Dubai, UAE

- First Product Manager embedded in Compliance, creating the function from scratch and extending product practice across Cybersecurity, HR and Travel.
- Shipped across four product domains with no dedicated engineering team, securing delivery capacity through peer PM partnerships and shared capacity models.
- Partnered with the Chief Compliance Officer to run discovery, test opportunities and set roadmaps across AML/KYC, sanctions screening, fraud prevention and privacy, turning compliance into a commercial enabler.
- Designed and launched an AI powered vendor intake and screening solution, automatically filtering high risk vendors and removing 20 hours of manual effort per month.
- Led the AI Governance programme, defining policies, tooling, training and adoption frameworks to support responsible AI deployment across the organisation.
- Launched Salesforce based sanctions screening integrated with Dow Jones, mitigating potential regulatory exposure of up to €20M or 4% of global annual turnover.

- Owned the HR technology roadmap across SuccessFactors and iCIMS, improving hiring, employee management and workforce processes through automation.
- Presented product strategy, commercial trade offs and delivery outcomes directly to executive leadership including the CCO, CLO and CFO.

Senior IT Programme Manager | Vista Global (VistaJet) *Mar 2021 – Feb 2022 | London, UK*

- Delivered the private aviation dining platform across iOS, Android and web, coordinating backend, mobile, web and DevOps workstreams alongside business ops, marketing and sales, achieving a 15% increase in customer satisfaction scores.
- Replaced a fully manual sales quoting process with an automated microservice based platform, the first monolithic to microservice migration in the business, saving 117 hours per week and supporting approximately \$1.2M in monthly revenue.
- Delivered under direct pressure from the COO, Director of Sales and company Founder on a high visibility, business critical programme.
- Governed a portfolio of high priority technology programmes across global aviation operations, managing senior stakeholders, third party vendors and distributed delivery teams.

IT Project Manager | Vista Global (VistaJet) *Sep 2017 – Mar 2021 | London, UK*

- Delivered business critical technology projects across global operations, managing requirements, plans, risks, budgets and vendor relationships.
- Introduced Agile delivery methodologies across cross functional teams, improving on time and on budget delivery performance.
- Reduced technical support resolution times by 35% through workflow optimisation and process redesign.

PMO Analyst | Agilisys *Aug 2016 – Sep 2017 | London, UK*

- Monitored IT project delivery for public sector clients, supporting governance, reporting, financial tracking and delivery oversight.

Technical Support Executive / Business Analyst | Sterling Data Rooms *Nov 2014 – Aug 2016 | London, UK*

- Primary contact for investigation and resolution of technical issues on a secure data room platform used by institutional clients; used Salesforce to track support trends and contribute to a 35% reduction in ticket resolution times.

CORE SKILLS

Product Mgt & Ops	Roadmapping - Backlog Grooming - Sprint Planning - UAT - Agile - Scrum - Kanban - User Stories - Release Management Feedback synthesis, product intake, cross-functional prioritisation, operational enablement, launch readiness, workflow design, process optimisation, change adoption
0 to 1 and Validation	Hypothesis design, customer discovery and interviews, rapid prototyping, MVP definition, kill and pivot criteria, KPI definition, commercial viability assessment, launch readiness
AI and Building:	LLM API integration, tool and function calling, agentic workflows, prompt engineering, no code and low code automation (n8n), Claude, ChatGPT, Copilot, Figma, Canva
Fintech & Compliance	AML/KYC, sanctions screening (Dow Jones), 3DS fraud automation, refund workflows, payment process integrity, third party risk
Regulatory	GDPR - UK GDPR - CCPA - UAE Data Regulation - Consent Management - Privacy Operations - ROPA - OneTrust
